

Kumaran Balachandran

Software Engineer

As a Software Engineer with 1+ years' background in creating and executing innovative software solutions to enhance business productivity. I have always been fascinated by the world of programming, and I consider myself lucky to have found a career that aligns with my passions. Throughout my career, I have had the opportunity to work with a variety of programming languages and technologies, which has allowed me to grow and develop as a programmer. While I have gained a considerable amount of knowledge and experience, I am always eager to continue learning and improving.

WORK EXPERIENCE

Software Developer

Softnits Solution 🔗

Sep/2023 - Present

Jaffna, Sri Lanka (Hybrid)

- I worked Project called GrowinUP for dyslexia kids, Use machine learning techniques like voice-to-text and text-to-voice with an interactive UI design. In this project I worked on creating UI design using React JS.
- In that project, I manage client meetings to ensure effective communication and expected project goals and facilitate celebrative decision-making.
- I worked on another project (like a 3D virtual voice assistant web app), I created landing page design using React JS and simultaneously doing research and learning LLM (large language model) and voice assistant applications for this project with my team members (Like Dialog systems).

Intern Software Engineer

Apptimus Tech (Pvt) Ltd 🔗

Aug/2022 - Mar/2023

Jaffna, Sri Lanka (On-Site)

- I learnt, developed a full-stack application using Laravel PHP Framework and ReactJs, with additional technologies such as JavaScript, MySQL, SqlYog and Gitlab CI/CD.
- Worked on the Moura E-Learning platform, participating in Scrum meetings and brainstorming sessions with teams. Specifically, focused on API development using Laravel and designed landing pages using ReactJs. Also, I assigned researched and developed a Zoom-like interface using Zoom SDK and ReactJs.
- Contributed to resolving bugs in ERP systems like Apptimate ERP and Northern Hospital Management systems, demonstrating problem-solving skills.
- Recognized as a fast learner and efficient worker by the CEO and teammates, showcasing adaptability and productivity in the workplace.

EDUCATION

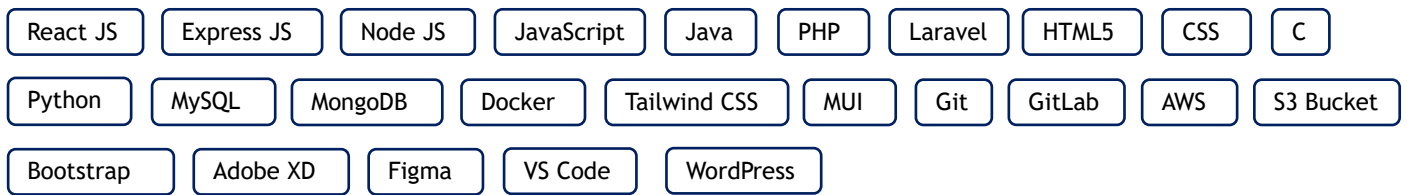

Bachelor of Information and Communication Technology (BICT Honors)

University Of Kelaniya, Sri Lanka.

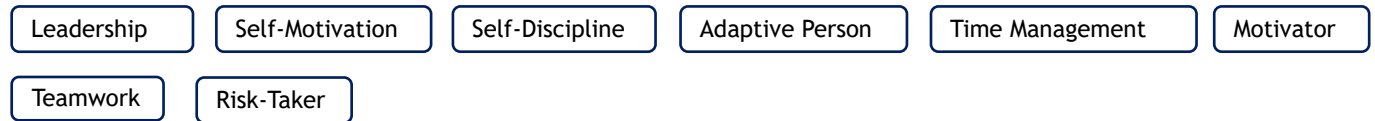

Second Class Upper Davison : GPA 3.46

2019 - 2023

TECHNICAL SKILLS

SOFT SKILLS

COURSES & TRAININGS

Full-stack Web Developer

Devtown 

Aug/2021 - Dec/2021

India (Remote)

- During my first training learn full-stack web application, I delved deep into MERN stack web development, concentrating on technologies like React JS, Express JS, Mongo DB, and Node JS, additionally learnt and apply microservices like axios, helmet. This experience allowed me to develop projects and fine-tune my workflow management skills, setting the stage for a focused and rewarding career in web development.

CERTIFICATES

Completed the AI for India | Apr 2021

GUVI Geek Networks, IITM

Build a Face Recognition Application using Python | Apr 2021

GUVI Geek Networks, IITM

Cloud Foundation | Jan 2024

Great Learning

User Experience Design from A-Z : Adobe XD UI/UX Design | Aug 2021

Udemy
